

humans
+ nature
+ life
+ cycle

= We lifecycle!

Environmentally and socially

Innovation always surprises at **SCA Packaging Nicollet**.

With support of SCA, we continue to develop our offer to you our customer.

As one of the leading Top 500 companies world wide, **SCA** has recently been named “**one of the world’s most ethical companies**” by the Ethisphere Institute (USA) and received awards from WWF and British consultant Innovest. I invite you to read the enclosed ‘We lifecyle’ SCA magazine, designed to inform you of the dedication of all our employees and management.

Throughout these challenging times, SCA has implemented across our business world-class **Lean Thinking** and **Commercial Excellence** programs to insure optimum service flexibility and efficiency for you.

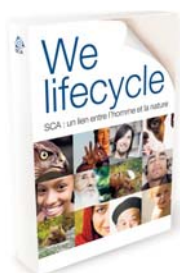

Today in SCA Packaging Nicollet, we have added a new dimension to our offer with **Sustainable Development**, in particular our **FSC*** certification and IMPRIM VERT* label. These recognitions by official bodies translate into meaningful customer messages for you to your customers.

Our Environmental story is developed across a dedicated organization and activities around **the Environmental, Social, and Economic themes** of our Sustainable Development program.

We are able to offer a new approach of our mutual partnership, from **eco-design proposals**, maximising the innovation needed to product marketing customer appeal, to optimum supply chain service using tailor made sustainable solutions.

I invite you to contact myself and my teams who anxiously look forward to working with you and your professional network to develop those **solutions that meet your requests**.

I would appreciate your comments, feedback on how we can continue to align our offer to your needs. Please feel welcomed to connect with my team on : scapackaging.nicollet@sca.com
